CLIMATE:

- Spring (Mar to mid-May) Temperatures and humidity rise gradually in spring. Evenings can be cool but lightweight jackets suffice. The average temperature ranges from 18°C-27°C (64°F-80°F), humidity about 82 per cent.
- Summer (late May to mid-Sept) Hot and humid with temperatures ranges from 26°C-33°C (78°F-91°F) and humidity near 86 per cent. Short sleeves and cotton clothes work best, with a lightweight sweater for indoors as restaurants tend to set air-conditioning on high. An umbrella or hat works well to ward off the sun.
- Autumn (late Sept to early Dec) Clear and sunny days are the norm in autumn. Short sleeves and light jackets are most suitable at this time of year. The average temperature ranges from 18°C-28°C (64°F-82°F), humidity about 72 per cent.
- Winter (mid-Dec to Feb) Winters are mild with low humidity at 72 per cent. Though the temperature ranges from 14°C-20°C (57°F-68°F), the mercury can drop to 10°C (50°F). Occasional chills make woolens and overcoats necessary.
