Institut Pasteur Course Innate Immunity and Infectious Diseases

Paris, April 10-25, 2017

A two ½ week-course taught in English dedicated to candidates with a medical or scientific training background who are interested in all aspects of this topic: medical students, scientific Master II and PhD students (Immunology, Bacteriology, Parasitology, Virology...), physicians, pharmacists, veterinarians.

Objectives of the course: This course is aimed to offer the most up-to-date information on the cellular and molecular players of innate immunity, and on the mechanisms that lead to the elimination of the pathogens, either of bacterial, viral, fungal or parasitic origin. Because innate immunity is closely associated with inflammation, the involvement of innate immunity with diseases will also be addressed. Finally, up-to-date tools to study the innate immune system will be presented.

More than 40 lectures from the experts in the field: Matthew Albert, Lionel Apetoh, Jagadeesh Bayry, Philippe Bousso, Jean-Marc Cavaillon, Nadine Cerf-Bensussan, Mathias Chamaillard, Julie Dechanet-Merville, Gérald Eberl, Ivo Gomperts-Boneca, Samy Gobaa, Oumaima Granet, Mélanie Hamon, Anne Hosmalin, Maria-Margarita Hurtado-Nedelec, Monique Lafon, Maria Leite de Moraes, Bruno Lemaître, Francisco Lozano, Salah Mecheri, Jean-Louis Mège, Eliane Meurs, Lorenzo Moretta, Mauro Perretti, Fabrice Porcheray, Jessica Quintin, Lluís Quintana-Murci, Lubka Roumenina, Jean-Michel Sallenave, Philippe Sansonetti, Daniel Scott-Algara, Geoffrey L Smith, Gerald Spaeth, Sofie Struyf, Lhousseine Touqui, Christophe Védrine, Laurence Weiss, Catherine Werts.
