## **COURS**

### **MOTHER-CHILD DYAD : Current evidence in a current perspective**

**Classroom 1 (building 09 - Pavillon Louis Martin)**

\*\*\*\*\*

#### **Directors of the cours**

**Bich-Tram HUYNH**  
Institut Pasteur - Paris

**bich-tram.huynh@pasteur.fr**

**Florence BODEAU-LIVINEC**  
Ecole des Hautes Etudes en Santé  
Publique – Paris

**Florence.bodeau-livinec@ehesp.fr**

## Monday, February 16

- 09h30-10h30 Welcome presentation & IT tools check  
Administrative Department
- 10h45-12h30 The DOHaD concept and its application  
in epidemiology **Marie-Aline CHARLES**  
(CRESS, OPPaLE, INSERM, UPC, Paris)
- 13h30 – 15h00 Neonatal pathophysiology : essential concepts  
for research on newborn health in a global  
perspective **Elsa KERMORVANT**  
(Université Paris Descartes,  
AP-HP, Paris)
- 15h15 – 17h00 The power of animal models in DOHaD research **Latifa NAJAR**  
(Centre de recherche Saint-Antoine,  
INSERM, UMR S938)

## Tuesday, February 17

- 09h00-12h30 The microbiome as a major determinant of  
maternal and child health **Philippe SANSONETTI**  
(Institut Pasteur, Paris)  
**Pascale VOANESCH**  
(Université de Lausanne)
- 13h30-15h00 Impact of environmental contaminants on offspring  
Health Mechanisms of action **Robert BAROUKI**  
(INSERM, UPC)
- 15h15-17h00 Impact of environmental contaminants on offspring  
health. The contribution of mother-child cohorts **Charline WAREMBOURG**  
(IRSET, Rennes)

## Wednesday February 18

- 9h30-11h00 Maternal imprinting on Immune System  
Development in Children **Yasmine BELKAID**  
(Institut Pasteur, Paris)
- 11h15-12h30 Epigenetics within the DOHaD context **Lucile BROSEUS**  
(INSERM, Grenoble)
- 13h30-15h00 Viral transmission through breastfeeding :  
mechanisms and risk assessment **Aurore VIDY-ROCHE**  
(Institut Pasteur, Université Paris-cité)
- 15h15-17h00 Qualitative studies and DOHaD **Priscille SAUVEGRAIN**  
(INSERM, CRESS)

## Thursday February 19

|             |                                                                                                                               |                                                              |
|-------------|-------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| 9h00-10h30  | How pathogens cross the placental barrier                                                                                     | <b>Olivier DISSON</b><br>(Institut Pasteur, Paris)           |
| 10h45-12h30 | Extended Spectrum Beta Lactamase Producing Enterobacteriaceae Mother to child Transmission in Low and middle-income countries | <b>Bich-Tram HUYNH</b><br>(Institut Pasteur, Paris)          |
| 10h00-12h30 | Sensibilité génétique de l'hôte aux agents infectieux                                                                         | <b>Laurent ABEL</b><br>(Faculté de Médecine - Necker, Paris) |
| 13h30-15h00 | Mother-child cohort in Sub-Saharan Africa in the context of malaria, HIV and environmental exposures                          | <b>Florence BODEAU-LIVINEC</b><br>(EHESP, Paris)             |
| 15h15-17h00 | Nutrition in pregnancy on offspring outcomes                                                                                  | <b>Blandine DELAUZON</b><br>(INSERM, CRESS)                  |

## Friday February 20

|             |                                                                                                                 |                                                                                                         |
|-------------|-----------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| 09h00-12h30 | Maternal mental health in the first 1000 days : exploring risk, protective factors, and effective interventions | <b>Judith VAN WAERDEN</b><br>(INSERM, IPLESP)                                                           |
| 12h30-12h45 | Evaluations of cours                                                                                            |                                                                                                         |
| 14h00-17h00 | EXAM                                                                                                            | <b>Florence BODEAU-LIVINEC</b><br>(EHESP, Paris)<br><b>Bich-Tram HUYNH</b><br>(Institut Pasteur, Paris) |
