

Pasteur Courses Eligible - 2026 Apprenticeship Tax

●	Advanced Immunology
●	Analysis of Data by Stata
●	Genome analysis
●	Climate Change and Population Health
●	Creation and Management of Data Bases
●	Development and Plasticity of the Nervous System
●	Emerging Viruses
●	Fundamental Immunology
●	Molecular Genetics and Epigenetics
●	Human Population Genomics and Genetics Epidemiology
●	Introductory Course in the R Software
●	Insect Vectors and Transmission of Pathogens
●	Medical Mycology
●	Microbiology
●	Modeling of Infectious Diseases
●	Molecular Biology of the Cell
●	Mother-Child Dyad: Current Evidence in a Global Perspective
●	Mouse Genetics for Disease Modelling
●	Principles and Applications of Fluorescence Microscopy
●	Multiple Roles of RNAs
●	Structure and Function of Proteins
●	Tuberculosis
●	Vaccine Epidemiology
●	Vaccinology
●	Fundamental Virology
●	Hearing: from Mechanisms to Restoration Technologies
●	The Last Mile: Towards Elimination of Major Infectious Diseases
●	Pandemics: Origin and Response

● Initial Training
● Continuous Training
